## NON AZEOTROPIC MIXTURES

### ABSTRACT

Non azeotropic mixtures of fluids to obtain polymeric foams comprising:

- HFC 365mfc in the following amounts:
  - from 5 to 7 parts by weight/100 parts of polymer in case of thermoplastic foams;
  - from 20 to 25 parts by weight/100 parts of polyol, in case of polyurethane foams;
- one or more fluorinated compounds, liquid at room temperature and having boiling point from 50°C to 150°C, having formula  $R'-R_f-R$  (I) wherein  $R'$  and  $R$  are as defined in the application.
